

SPILL MASTER

FLOOR SWEEP

Spill Master is an inert inorganic blend of amorphous siliceous mineral. It is lightweight, absorbent, non-toxic, nonflammable and environmentally safe and friendly. It contains no hazardous ingredients as defined by the U.S. Environmental Protection Agency (EPA), U.S. Occupational Safety and Health Administration (OSHA), or the World Health Organization (WHO). It is non-injurious to asphalt, cement, carpet, tile, soil, animal and plant life. Its attributes are defined as follows:

Encapsulates: When Spill Master is scrubbed aggressively with a stiff bristle broom, it encapsulates all lost liquids including hazardous waste, heavy metals, battery acid, fuel oils, animal fats and blood borne pathogens. Outperforms clay based products by an average of 14:1, and as high as 22:1. Incinerates all encapsulated liquids at 500 degrees with zero ash count, some exceptions may apply such as unrefined heavy crude oil. It converts to a glass like substance at 2,500°. Safe for absorbing and picking up all liquid spills except Hydrofluoric acid.

Compared to Clay Products

- More Absorbent
- Absorbs Quicker
- Reduces Waste
- Safer Work Environment
